Session 1A, 9:00 – 10:10 am Thursday, October 19, Contessa A

Innovations in Demographic Methods
Presider: Elwood Carlson, Florida State University

Application of the Extended Log Quad Model to Municipal Life Tables of Japan
Yu Horiguchi, Keio University

Developing scalable methods that identify vulnerable populations
Marie Urban, Oak Ridge National Laboratory
Joe Tuccillo, Oak Ridge National Laboratory
Sarah Walters, Oak Ridge National Laboratory
Jessica Moehl, Oak Ridge National Laboratory
Angela Cunningham, Oak Ridge National Laboratory
Ty Frazier, Oak Ridge National Laboratory

Developing a New Demographic Risk Index
Lillian Kilduff, Population Reference Bureau
Mark Mather, Population Reference Bureau

Explainable Artificial Intelligence for Bias Identification and Mitigation in Demographic Models
Atul Rawal, U.S. Census Bureau
James McCoy, U.S. Census Bureau
Sandy L Dietrich, U.S. Census Bureau

Session 1B, 9:00 – 10:10 am Thursday, October 19, Contessa B

LGBT Health/ Dating and Marriage
Presider: Andrew Kim, University of Pennsylvania

Association of State-Level LGBT Policy Environment with Psychological Distress, Anxiety, and Depression among Lesbian, Gay, and Bisexual Adults, 2013-2020
Gabe H. Miller, University of Alabama at Birmingham

The Effects of LGBT Community Connectedness on Alcohol Consumption among Sexual and Gender Minorities
Michael Segovia, University of Texas at San Antonio
Johnelle P. Sparks, University of Texas at San Antonio

Structural Heteropatriarchy and Marriage: Evidence from the 2021 ACS
Kara Joyner, University of Texas at San Antonio

Getting married “out of season”? Atypical choices of wedding dates in same-sex marriages in France
Gaëlle Meslay, INED/University of Texas at Austin
## Session 1C, 9:00 – 10:10 am Thursday, October 19, Cedar

### Demography of the South

**Presider: Wesley James, University of Memphis**

**Trends in Deaths of Despair in Texas, 2000 to 2020**
*Camerino I. Salazar, University of Texas at San Antonio*

**Association Between the Changes in the Numbers of Emergency Medical Services and COVID-19 Deaths in Texas Using Spatial Panel Model**
*Megumi Tanabe, Texas A&M University*

**Exploring the relationship between gentrification and neighborhood health in Bexar County, Texas**
*Christina Quintanilla-Munoz, University of Texas at San Antonio*

## Session 1D, 9:00 – 10:10 am Thursday, October 19, Laurel

### Pandemic to Prosperity Workshop

**Presider: Alysha Rashid, Storied Analytics**

**Pandemic to Prosperity: South | Measuring Rapid Changes to Build Prosperous and Resilient Communities**

Pandemic to Prosperity: South illuminates the challenges facing the South’s most vulnerable and provides excellent context for demographic research under rapidly changing circumstances. The South is currently struggling with extreme excess deaths rates, assaults on democracy, and economic hardships that shot up during the pandemic and have yet to wane. Pandemic to Prosperity: South quarterly tracks a timely collection of indicators based on the lived experience of Southerners as the impacts of the pandemic and economic shocks continue to reverberate. Pandemic to Prosperity: South offers an overview of recent impacts on lives and livelihoods, governments, civic institutions, and overall well-being, with a focus on 12 Southern states: Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Virginia, and West Virginia.

This workshop will include a 30-minute presentation, followed by interactive group discussions.

Alysha Rashid, Storied Analytics
Allison Plyer, National Conference on Citizenship (NCOC)
Elaine Ortiz, National Conference on Citizenship (NCOC)
Taylor Savell, National Conference on Citizenship (NCOC)
Disasters and Environment

Presider: Sarah Sharmin, University of Texas at San Antonio

A systematic review of climate migration modeling
  Sunshine Jacobs, Florida State University

County-level Climate Indicators and Health
  Jarron Saint Onge, University of Kansas
  Dorothy Daley, University of Kansas

Revisiting the Demography of Disaster: Population Estimates After Hurricane Maria
  Alexis R. Santos, The Pennsylvania State University

Impacts of Coastal Flooding on Social and Economic Well-Being
  Nathan Dollar, University of North Carolina at Chapel Hill
  Anna Gardner, University of North Carolina at Chapel Hill
  Rene Iwo, University of North Carolina at Chapel Hill
  Bethany Stoutamire, University of North Carolina at Chapel Hill
  Nikhil Kothegal, University of North Carolina at Chapel Hill
  Kristen Cowan, University of North Carolina at Chapel Hill
Session 2B, 10:20 – 11:30 am Thursday, October 19, Contessa B

Social Context

Presider: Justin Denney, Washington State University

Spatializing the Culture Surrounding Death to Capture Patterns of Life: Informing the High-Resolution Population Modeling of Cemeteries
Sarah Walters, Oak Ridge National Laboratory
Marie Urban, Oak Ridge National Laboratory
Lauryn Bragg, Oak Ridge National Laboratory
Zachary Palmer, Oak Ridge National Laboratory

Race and Place: Uncovering Spatial Disparities Through Population Weighted Centers of Population
Drew Schaefer, University of Texas at San Antonio
Lynne Cossman, University of Texas at San Antonio
Jacob Souch, University of Texas at San Antonio
Julia Kay Wolf, University of Texas at San Antonio

County-level Contextual Factors associated with Cardiometabolic Disease in the United States
Rebecca Jones-Antwi, Baylor University
Solveig Cunningham; Emory University

Do Religious Struggles Mediate the Association between Neighborhood Disorder and Health in the United States?
Terrence D. Hill, University of Texas at San Antonio

Session 2C, 10:20 – 11:30 am Thursday, October 19, Contessa A

Aging

Presider: David Warner, University of Alabama at Birmingham

Just a Touch of Grey: Overview of NYC’s latest 2020 Census age data and guidance on responsible use
Erica Maurer, NYC Department of City Planning
Joel Alvarez, NYC Department of City Planning

Aging Patterns and Trends in the United States from a Demographic Perspective
Richard Rogers, University of Colorado Boulder

Geographic Variation Across Cognitive Domains: Evidence from the UK Biobank
Michael Topping, University of Wisconsin-Madison
Jinho Kim, Korea University
Jason Fletcher, University of Wisconsin-Madison

Old-Age Care Across Borders: US Migration Policy and Kin Support in Mexican Families
Leafia Ye, University of Wisconsin-Madison
Jenna Nobles, University of Wisconsin-Madison
Fernando Riosmena, University of Texas at San Antonio
REU/Flash: Data Science for Social Good

Presider: Lynne Stokes, Southern Methodist University’s Research Experience for Undergraduates (REU)

Financial Analysis of Evictions in Dallas County
Christine Jator, Austin Peay State University
Katie Lark, Wheaton College
Ashley Pritchard, Kansas State University

Economic Viability of Semi-Urban Communities
Elliott Abel, Pomona College
David Brock, Dallas College

Exploring Food Access and Justice Through Urban Farms: Insights From South Dallas
Aaron Avila, Texas A&M University
Mark Ayiah, Yale University
Jacob Stavely, Southern Methodist University
Adolescents No Longer: A Sneak Peek at Wave VI of the National Longitudinal Study of Adolescent to Adult Health (Add Health) as the Cohort Moves Toward Midlife

Robert Hummer
SDA Plenary Speaker 2023

Robert A. Hummer is the Howard W. Odum Distinguished Professor of Sociology and Fellow of the Carolina Population Center at the University of North Carolina at Chapel Hill. He served as the 2021 President of the Population Association of America and was elected to the American Academy of Arts & Sciences in 2023. He is currently a member of the Committee on Population of the National Academies of Sciences, Engineering. His research focuses on the accurate documentation and more complete understanding of health and mortality disparities in the United States. His most recent book, co-authored with Erin Hamilton and entitled Population Health in America, was published by the University of California Press in 2019. Since 2021, he has served as Director and Principal Investigator of the long-running National Longitudinal Study of Adolescent to Adult Health (Add Health). Now in its sixth wave, Add Health is one of the most innovative and well-utilized nationally representative cohort studies of Americans ever undertaken and provides data for thousands of researchers to more fully understand the multi-level (biological, survey, contextual) life course factors that contribute to health and health disparities in US adolescents and adults.
THURSDAY, OCTOBER 19, 2023 – SESSION PERIOD III

Session 3A, 1:30 – 2:40 PM Thursday, October 19, Cedar

Innovations in Data

Presider: Stephanie Hernandez, Drexel University

Preliminary Findings and Recommendations from the U.S. Census Bureau’s Base Evaluation and Research Team
    Luke Rogers, U.S. Census Bureau
    Christine Hartley, U.S. Census Bureau

Using online crowdsourced genealogies to measure the migrant mortality advantage between the 18th and 19th centuries
    Elena Pojman, The Pennsylvania State University
    Duke Mwedzi, Cornell University

Why Data Equity Requires Geographic Disaggregation
    Teresa A. Sullivan, University of Virginia

LandScan Global: A History into the 30 Arc-second Global Gridded Annual Population Dataset
    Kelly Sims, Oak Ridge National Laboratory
    Viswadeep Lebakula, Oak Ridge National Laboratory
    Andrew Reith, Oak Ridge National Laboratory
    Amy Rose, Oak Ridge National Laboratory
    Eddie Bright, Oak Ridge National Laboratory

Session 3B, 1:30 – 2:40 PM Thursday, October 19, Contessa A

Mortality

Presider: Michael Topping, University of Wisconsin-Madison

Cause-of-Death Contributions to the Hispanic Advantage in Life Expectancy
    Joseph Lariscy, University of Memphis
    Aggie Yellow Horse, Arizona State University

Hearing Impairment and U.S. Adult Mortality
    Justin T. Denney, Washington State University

Obesity and All-cause Mortality in the Hispanic Population by Nativity and Length of Stay
    Daniel Mamani, University of Texas at San Antonio

    Jeffrey Howard, University of Texas at San Antonio
Session 3C, 1:30 – 2:40 PM Thursday, October 19, Contessa B

Reproductive Health and Fertility

Presider: Julia Kay Wolf, University of Texas at San Antonio

The Effects of Restrictive Abortion Policies on Birth Outcomes in 2019
  Zoë Bergman, University of Utah
  Bethany Everett, University of Utah

Overburdening of Abortion Clinics in Post-Roe America: Problems of Access and Allocation
  Jacob M. Souch, University of Texas at San Antonio
  Jeralynn S. Cossman, University of Texas at San Antonio
  Drew Schaefer, University of Texas at San Antonio
  Julia Kay Wolf, University of Texas at San Antonio

Negative Reproductive Outcomes: Social Determinants or Individual Behavior?
  Richard K. Thomas, University of Tennessee Health Science Center

China’s Second Birth Baby Boom Following the End of One-Child Limits
  Daniel Goodkind, Independent Researcher

Session 3D, 1:30 – 2:40 PM Thursday, October 19, Laurel

Leveraging the U.S. Census Bureau’s Demographic Frame for Official Statistics

Presider: Anthony Knapp, U.S. Census Bureau

The U.S. Census Bureau’s Demographic Frame is a comprehensive, secure, access-controlled database of person-level data consisting of demographic, social, and economic characteristics of individuals derived from census, survey, administrative, and third-party data sources. It includes unique person-level identifiers used to link individuals across datasets and their information across time and space. The valuable information compiled in the Demographic Frame will enable the Census Bureau to continue providing high-quality data and statistics about the nation and its communities. It will facilitate innovations in data collection, processing, analyses, and products.

During this session, Census Bureau staff will introduce the Demographic Frame and detail initial assessments of the fitness for use of the Demographic Frame for census and survey taking. Coverage and accuracy of the current frame, utility in American Community Survey field operations, and applicability for the Community Resilience Estimates will be discussed.

  Sandy L. Clark, U.S. Census Bureau
  R. Chase Sawyer, U.S. Census Bureau
  Anthony Knapp, U.S. Census Bureau
### Session 4A, 2:50 – 4:00 PM Thursday, October 19, Contessa B

#### Marriage, Family, Race, and Earnings

**Presider:** Stephanie Potochnick, University of North Carolina at Charlotte

- **Structural constraints, the gendered division of labor, and marital stability across social classes**  
  Kimberly McErlean, University of Texas at Austin

- **When Good is Bad: Hyper-selectivity, Model Minority Image, and the Earnings of Less-Educated Asian Americans**  
  Andrew Taeho Kim, University of Pennsylvania  
  ChangHwan Kim, University of Kansas

- **Debt and transition to parenthood using NLSY97**  
  Cristina E. Martinez, University of Texas at San Antonio

- **Direct Marriage, Indirect Marriage, and the Effect of Parenthood on the Within-Couples’ Earnings Gap**  
  Lisa Carlson, Carolina Demography, Carolina Population Center, University of North Carolina at Chapel Hill
Session 4B, 2:50 – 4:00 PM Thursday, October 19, Contessa A

Flash Session

Presider: Stephanie Bohon, University of Tennessee

The Absorption of Metropolitan Immigrants: Advanced Computing Techniques for Analyzing Adaptation Across Time and Place
   Stephanie A. Bohon, University of Tennessee
   Christian Lewelling, University of Tennessee
   Reed Sarasua Tucker, National Institute for Computational Sciences

Sex Ratio and Group Size Constrain Ethnic Endogamy
   Elwood Carlson, Florida State University

Who do Americans think should provide health-related services and how effective do they think the government is at doing so?
   Julia Kay Wolf, University of Texas at San Antonio
   Lynne S. Cossman, University of Texas at San Antonio

Applicability of the Night Time Light Data as an Ancillary Tool to Estimate the Population at the County Level of Texas
   Muhammad Salaha Uddin, University of Texas at San Antonio
   Lloyd Potter, University of Texas at San Antonio

Gender, selection and changing composition of Mexican emigration in the 21st century
   Andrea Miranda-González, University of California, Berkeley

Stress Testing ML Classifiers with ACS MOEs
   Collin McCarter, Northwestern Mutual

Social Isolation and Risk of Dementia: Do Race-Ethnicity and Gender Matter?
   Zhiyong Lin, University of Texas at San Antonio

Are Parents and Children Speaking the Same Language at Home? A Cross-survey Comparison on the Languages spoken in U.S. Households that Speak a Language Other Than English
   Sandy Dietrich, U.S. Census Bureau
   Besufekad Alemu, U.S. Census Bureau

Fear and Grief Following the 1946 and 1960 Hawai’i Tsunamis
   Saakshi Kale, Emory University

A New Index to Measure Unjust Exposures to Air Pollution in Racially Segregated Neighborhoods
   Heeju Sohn, Emory University
   Xu Ji, Emory University
The decennial census is the bedrock of the U.S. statistical system so the quality of that data is extremely important. Census Bureau evidence indicates young children were undercounted at a high rate (5.4 percent) in the 2020 Census. In this session the audience will hear several presentations about how researchers have analyzed data from the 2020 Census to gain a better understanding about children and to explore some of the limitations of the 2020 Census data on children. Session participants will leave with a better understanding of the kinds of data on children available from the Census, and some of the potential issues with the quality of that data.

The Undercount of Young Children in the 2020 Census and How we Move Forward
Eric Jensen, U.S. Census Bureau
Lauren Medina, U.S. Census Bureau

The Changing Young Child Population: First Data from the 2020 Census
Alysha Rashid, Storied Analytics

The Number of Young Hispanic Children in the Population Estimates Program Blended Base Compared to the 2020 Census Count
Susana Quiros, University of Missouri
William O’Hare, Consultant to Count All Kids Campaign

The Undercount of Children in Texas Counties
Francisco Castellanos-Sosa, Texas Census Institute

Comparing the Undercount of Young Children in the 2020 Census to the Undercount in the 2010 Census
William O’Hare, Consultant to Count All Kids Campaign
Cashing in on Medical Emergencies: Assessment of Types of Services Offered by Emergency Medical Services Across Entity Types
Megumi Tanabe, Texas A&M University

It’s Not Our First Plague: Gay Men and the Covid-19 Vaccine
Marcus A. LaFrenz, University of Texas at San Antonio

Religious Affiliation and Obesity among Immigrants to the United States
Samira Rahman, University of Memphis
Joseph Lariscy, University of Memphis

Protective factors to mental health problems caused by regular adversity experiences
Yurie Momose, University of Tokyo

Puerto Rico: A History of Forced Sterilizations and Current Trends in Fertility
Rebecca Luttinen, University of Texas at San Antonio
Rogelio Sáenz, University of Texas at San Antonio

Examining Syndemic and Psychosocial Factors: Impacts on HIV Diagnoses among Historically Marginalized Communities in Texas
Adolph "AJ" Delgado, University of Texas at San Antonio
Rogelio Sáenz, University of Texas at San Antonio
Johnelle Sparks, University of Texas at San Antonio

Who Owns Texas? Exploring the Socioeconomic Aspects of Texan Housing Tenure, 2006-2021
Sarah Serpas, University of Texas at San Antonio

Returns to Rigor: Who has the opportunity to major in STEM?
Vansa Shewakramani Hanson, Texas A&M University

Comparison of Future Projections and Simulation Results of Household Energy Consumption in Japan, 2020-2040
Nozomu Inoue, National Institute of Population and Social Security Research

Christine Hartley, U.S. Census Bureau
Katrina Wengert, U.S. Census Bureau
Luke Rogers, U.S. Census Bureau
THURSDAY, OCTOBER 19, 2023 – EVENING OVERVIEW

5:00 – 9:00 pm Thursday, October 19

5:00 pm – 5:30 pm  President’s Welcoming Remarks  Contessa A & B
SDA Memorial Remembrances
   Presiders: Michael Cline,
   Wes James, and Dudley Poston

5:30 pm – 6:00 pm  Presidential Reception and Awards  Contessa A & B

7:00 pm – 9:00 pm  SDA Dinner  The Spire*

* We will meet in front of Hotel Contessa at 6:40 to walk to the Spire

FRIDAY, OCTOBER 20, 2023 – SESSION PERIOD VI

Session 6A, 10:20 – 11:30 AM Friday, October 20, Contessa B

Demographic Impacts of COVID-19

Presider: Sarah Salas, University of Wisconsin-Madison

Pandemic Job Separation and Psychological Distress: Modeling Chains of Adversity
Terrence D. Hill, University of Texas at San Antonio

I Can’t Get No Satisfaction! Job Satisfaction’s Association with Healthcare Professionals’ Career Exit and Retirement in the Aftermath of the COVID Pandemic
Yetty Shobo, The Healthcare Workforce Data Center, VA Department of Health Professions

Activity Limitations of Older Adults Were Predictive of Financial Difficulties during the COVID-19 Pandemic
Erica S Jablonski, Institute on Disability, University of New Hampshire

State Housing Policies and Renter Mental Health during the COVID Pandemic
Brian Surratt, University of Texas at San Antonio
Kara Joyner, University of Texas at San Antonio
The recently released Demographic and Housing Characteristics File (DHC) and Detailed DHC-A provided a wealth of information from the 2020 Census. As data users have started to use these products, they also learned about the impact of the new approach for disclosure avoidance used this decade. While this new approach for disclosure avoidance provides greater privacy protection than previous methods, it results in implausible and impossible scenarios that data users may not have expected (e.g., inconsistencies between person and housing unit tables). These results are due to deliberate design features of the disclosure avoidance protections.

This session includes three presentations. The first presentation provides high level findings from the 2020 Census data that were previously released. This includes data from the DHC and Detailed DHC-A. The second presentation addresses some data user concerns when encountering implausible and impossible results. The third presentation provides updates on the remaining 2020 Census data products, mainly the Detailed DHC-B and S-DHC.

Jason Devine, Population Division, U.S. Census Bureau
Matthew Spence, Population Division, U.S. Census Bureau
Alexandra Krause, Population Division, U.S. Census Bureau
Health 2

Deconstructing Database Reconstruction: History of a Census Bureau Statistical Experiment

Steven Ruggles
SDA Plenary Speaker 2023

Steven Ruggles is Regents Professor of History and Population Studies at the University of Minnesota. He is best-known as the creator of IPUMS, the world’s largest population database. IPUMS provides information about over two billion people residing in 167 countries between 1703 and 2023, including every respondent to the surviving U.S. censuses of 1790 to 1950. Ruggles has published extensively on historical demography, focusing especially on long-run changes in multigenerational families, single parenthood, divorce, and marriage, and on methods for population history.

In 2022 Ruggles received a MacArthur “genius” award in recognition of his work on IPUMS. Other awards include the Sharlin Award (Social Science History Association), the Goode Award (American Sociological Association), the Lapham Award (Population Association of America), the Gallman-Parker Award (Economic History Association), and the Miller Award (Inter-university Consortium for Political and Social Research). In 1995, he was named “King of Quant” by Wired Magazine; in 2014, he was named a “Wonkblog-Certified Data Wizard” by the Washington Post. He has served as President of the Population Association of America (2015), the Association of Population Centers (2017-2018), and the Social Science History Association (2018-2019). Ruggles received a Ph.D. in History with a specialization in historical demography at the University of Pennsylvania and did postdoctoral training in demography at the University of Wisconsin.
FRIDAY, OCTOBER 20, 2023 – SESSION PERIOD VII

Session 7A, 1:30 – 2:40 PM Friday, October 20, Cedar

Publishing in Population Research and Policy Review

David F. Warner, University of Alabama at Birmingham
Kara Joyner, University of Texas at San Antonio

Session 7B, 1:30 – 2:40 PM Friday, October 20, Contessa B

Labor Market Supply and Outcomes

Presider: Jacob Souch, University of Texas at San Antonio

Andrea Bautista-Leon, Universidad La Salle
Guadalupe Camacho-Sánchez, UNAM
Gabrifel E. Hernández-Castro, IMSS

A Look at the Supply and Demand of Geriatric Professionals
Rajana Siva, Virginia Department of Health Professions

Spatial Autoregressive Models: Associations of Internal Migration with Local Labor Market Outcomes
Nereyda Ortiz, Texas A&M University
Ernesto F. L. Amaral, Texas A&M University

Occupational English Requirements and Reported English Proficiency: A Study of Immigrant Earnings and Labor Market Outcomes
Besufekad Alemu, U.S. Census Bureau
In this session, demographers will share their perspectives on projecting population and discuss some of the challenges and modifications they have had to make in modeling population change. We will discuss how the impacts of changes in U.S. Census Bureau data reporting due to new privacy protection measures, delays in reporting the results of the 2020 Census, the COVID-19 pandemic, and long-term trends in fertility, mortality, and migration have required us to re-think existing models and make modifications to more accurately predict future population change.

Michael Cline, State Demographer, North Carolina
Helen You, Texas Demographic Center
Lila Valencia, Demographer, City of Austin
David Powell, City of San Antonio Planning Department
Jacqueline Miller, Sr. Research Scientist, University of New Mexico Geospatial and Population Studies
